New IUPUI accelerated degree programs in Technical Communication or Organizational Leadership provide enhanced professional opportunities for students

Students can now earn bachelor’s degree and a master’s degree in Technical Communication or Organizational Leadership on IUPUI’s campus in a new accelerated program that will prepare students for exciting professional opportunities in either field.

By taking several graduate courses in the final year of undergraduate study, qualified students can earn both degrees in a span of only five years instead of the usual six years.

In the fall of 2020, the Department of Technology Leadership & Communication in Purdue’s School of Engineering & Technology at IUPUI will begin offering accelerated degree options in which highly motivated students can earn either:

- a Bachelor of Science in Technology degree with a Technical Communication major and a Master of Science in Technology with a Technical Communication Concentration
  
or

- a Bachelor of Science in Technology degree with an Organizational Leadership major and a Master of Science in Technology with an Organizational Leadership Concentration

Courses feature a beneficial blend of practice undergirded by sound up-to-date principles, enhancing options for career tracks that are projected for strong growth in the coming decade.

Many of the courses are offered online for the benefit of busy working professionals.

Each bachelor’s degree program provides students with a solid foundation in their disciplines, and each master’s degree prepares students for a variety of significant leadership positions.
